Experience

Software Engineering Intern – ALX Africa

September 2023 – November 2024

- Delivered 30+ cross-domain projects using Python, JavaScript, and C, leveraging Git, Emacs, and Bash for efficient development and automation, demonstrating strong problem-solving and collaboration skills
- Designed and Built Libi-bot, an AI-powered mobile app featuring multi-bot interaction, earning a distinguished final grade of 128%, the highest in the cohort.

Artificial Intelligence Trainee – NTI

September 2024 – October 2024

- Developed expertise in STLC fundamentals and Agile practices, focusing on functional and regression testing.
- Gained hands-on experience with API testing, defect reporting, and documentation.
- Contributed to test plan creation and execution, reinforcing quality standards.

Flutter Mobile Development Trainee – ITI

June 2023 – July 2023

- Crafted responsive, and high-performance mobile apps using Flutter and Firebase.
- Implemented robust authentication and real-time database synchronization for scalable solutions.

Education

Bachelor of Computer and Systems Engineering, Ain Shams University

September 2020 – Present

Expected Graduation: June 2025

GPA: 3.33

Projects

- Jawwed Mobile Application | React Native** September 2024 - Present
 - Created an AI-assisted Holy Quran application to facilitate reading, memorization, and learning through an intuitive React Native interface.
- Libi-Bot | React Native** October 2024 – November 2024
 - Launched an AI-powered chatbot using React Native, integrating Stable Diffusion for text-to-image generation and Gemini API for text processing.
 - Enhanced user experience by implementing multi-bot interaction, text-to-speech, and persistent conversation history, having response latency < 1.2 seconds through optimized API calls.
- Othello (Reversi) game vs. AI | Java** April 2024 – June 2024
 - Guided the team in creating diverse gameplay modes for human and AI players, showcasing strong leadership, using Agile (Scrum) methodologies.
 - Engineered Minimax-based AI with α - β pruning, achieving a move accuracy of 92%+ at deeper search depths.
- Levels Club Reservation Software | Java** December 2023 - February 2024
 - Built a JavaFX-based reservation system handling 30+ daily bookings, streamlining football field scheduling and payments.
 - Improved payment tracking and archiving, reducing inconsistencies by 40% and enhancing audit efficiency.
- UNIX shell | C** November 2023 – December 2023
 - Engineered a Unix shell in C, replicating the standard Unix shell functionalities.

Technologies and Languages

Programming Languages: Java, C/C++, Python, Dart, JavaScript

Frameworks & Tools: JavaFX, Flutter, ReactJS, React Native, JUnit, Jest

Databases: MySQL, MongoDB
